

Call for Action

On April 15th, a million or more Citizens attended “Tea Parties” throughout the US. In Rhode Island, a bastion of liberal conceit, several thousand Citizens showed up at the Statehouse to denounce the path we are on. Those who attended should feel proud. But for each who attended, a dozen or more wished to but couldn’t. They had other commitments. Well, now we all have another chance. **On June 10th a second “Tea Party” will be held, again at the RI State House.**

June 10th has been chosen to **honor those who burned the British revenue ship the HMS Gaspee**, but more importantly, **the date has been chosen because the RI General Assembly will be in session. AND WE WANT THEM TO HEAR US!** Many of our representatives are in denial, and we need to change that. We want them to **feel** our roar: **“It’s time for cutting, not spending!”** And if little Rhode Island can roar loud enough, we’ll shake the Country to its very foundation, and in so doing help nourish the Tree of Liberty’s thirsty roots.

So if at all possible, be at the RI State House on June 10th. If that means taking time off work, what the heck, our government seems hell-bent on shutting the economy down anyway. Of course, with summer fast approaching, there are hundreds of other demands on our time: Kids have soccer games; graduations are coming; there are cookouts and softball games to attend; “block-busters” beckon; and we need to gear up for the beach. There are plenty of pleasant and some not-quite-so pleasant distractions. But remember what’s at stake:

- Our Freedoms and Liberties – what we can say and what we can do – have been under siege for too long.
- Our Sovereignty as a State and a Nation are threatened.
- And our ability to control how much taxes are taken and how these monies are spent is all but nonexistent.

We are living through a Liberal power grab – a Socialist power grab – that is unprecedented in its sheer audacity. Things are getting down to the bone, not just in Rhode Island, but throughout this Great Country. Indeed, some might say the cutting edge is Rhode Island. Well we say, “That’s enough!” Our patience is spent! Now our peaceful resistance to the madness in Providence and Washington must be unprecedented in its sheer tenacity. Any slackening will be pitched as defeat, so **we want 5000 people, we want 10,000 people to join us on June 10th at the RI State House.** Bring friends. Have your friends bring their friends. We want as many people as can possibly fit and then some!

Will this be the last Tea Party? No. How many more will there be and how long will this take? How long did it take to birth this Nation? How long does it take to do anything large and important? It will take as long as it takes! So it’s not a matter of showing up once. It’s not matter of showing up twice or even half-a-dozen times. It’s a matter of showing up when we’re needed for as long as it takes. And we are next needed on the **June 10th, 2009, at the RI State House.** So decide where your priorities lie, then exercise your Freedom and act in full measure. We must strive to stand tall in the shadow of our Founding Fathers and Mothers. We must exert every effort to fill their large shoes.

Respectfully yours,
We the People
