

An Open Letter to Governor Donald Carcieri

Dear Governor:

While the health-care debate is in full swing, a more immediate health issue threatens: Swine Flu and the Swine Flu vaccine.

In the last few weeks, practicing physicians have begun to openly confirm what previously was viewed more as Internet rumor than fact: The H1N1 virus could well be man-made – a weaponized virus; serious preparations have been made for the possibility of mandatory inoculations, including the possible branding of those inoculated with RFID-wrist-bands and severely curtailing the movements of those who refuse – right up to the possibility they could be taken from their homes and put into isolation camps.

Doctors are telling these things to their patients during routine check-ups! And there are many health-care providers who swear they will have no part of this vaccine.

These measures raise red flags of the most urgent alarm!

When the Swine Flu first appeared in Mexico, the death rates were relatively high, but the US Government ***did nothing*** to close or even slow border traffic. So why now are such draconian measures in the works? What has changed? If the virus could mutate into something more deadly, what good would the vaccine be? Conversely, what purpose would be served by isolating those who refuse the vaccine? Would they be protected from infection, or would their isolation protect the general population? But in that instance, why vaccinate in the first place?

There is no apparent logic to the steps being readied for imminent implementation, yet as you know, Massachusetts has given Deval Patrick the authority to quickly implement the very steps outlined above. The State of Maine squawks a similar tune, as do some states in the mid-west. And as for “camps,” what appear to be transportation facilities are being readied right here in Rhode Island!

These measures cannot be rationalized; they are un-Constitutional; and for many Citizens they **underscore a deepening distrust of our Federal Government**. Isolation camps? Good Lord!!! We urge you in the strongest possible terms to resist all efforts to follow suit and to consider taking steps to re-affirm State sovereignty; you would have the immediate and enthusiastic backing of a great many Rhode Islanders! To help you understand the threat we perceive, we recommend you visit these two web sites:

<http://www.youtube.com/watch?v=jsGywkX3wFc>

Yours is not an easy seat to have, especially now, but we can think of no one we'd rather have sitting there. And no other issue is more immediately threatening to the Rights and well-being of our State's Citizens. Thank you for all you strive to do for Rhode Island!

Regards,
We The People
